CLASSIC STD M2

Code PE07359-IT-GP

Made in Italy

Standard sizes (mm)
520

Motorized	15kg+/-1 kg	Armchair	MAX 170kg 380lbs Maximum capacity	Cycles:30.000	2YEARS Mechanism 2YEARS Actuator Warranty
-----------	-------------	----------	---	---------------	---

Positions:

Closed

TV

Full Relax

**Benefit:** The KEYMOTION mechanisms are built entirely in Italy, from the raw material, to the processing, up to the final assembly and testing. The products are carefully checked before being shipped. This mechanism is designed to ensure high lifting performance and comfort, facilitating the everyday life of the most needy user. Two motors regulate the different

positions: closed, TV and full relax. The first actuator extends the footboard by doing a slight tilting action to the seat and backrest; the second actuator instead reclines the backrest until you reach the Full Relax position. LEVANTE CLASSIC STD M2 has been designed to create padded CLOSED BASE (low foot).

Positions:

**Benefit:** The KEYMOTION mechanisms are built entirely in Italy, from the raw material, to the processing, up to the final assembly and testing. The products are carefully checked before being shipped. This mechanism has been designed specifically to ensure maximum comfort, is equipped with a flap that increases the extension of the footboard improving the performance in the TV position and full relaxation. Three actuators adjust the different positions, ensuring infinite positions, from closed to TV, from full relaxation to the lift.

The first actuator extends the footboard and plays a light tilting action of the seat and back; the second actuator reclines the backrest reaching the position of maximum comfort called full relax. Both movements are independent of each other, to allow any postural position. The third actuator was inserted in parallel to the first, to increase the maximum lifting capacity. The lift system lifts the padded (from Closed position) allowing the person to stand upright. The mechanism is equipped with a base.
